## STEAM PAN

- > This option can be installed all types of evaporators (wood, pellet, oil). Many standard sizes available.
- > The use of the steam pan causes a significant reduction in energy consumption by reusing the steam produced by the flue pan. This reduction in energy consumption can be up to 75% depending on the brix at the input of the pan.
- > In addition, adding this option to the evaporator increases the evaporation capacity by up to 75% without additional fuel consumption.
