Dear Customers,

The 2025 season is already upon us! The release of our new catalog always marks a special time of year: a moment to reflect on memories from the previous season and to eagerly anticipate the next.

The year 2024 was marked by an exceptional sugaring season for a large majority of North American maple producers. This past year, CDL also took a significant step in extending its integration by acquiring a wonderful family-owned company in the Bas-St-Laurent region of Quebec: Prestige Maple Products Inc. This acquisition enables our company to become the only one in the industry fully integrated from tree to consumer. This unique positioning allows us to acquire the knowledge needed to continue advancing maple practices and technologies, contributing to the growth of our beloved industry.

In terms of equipment, the shift towards renewable energy, automation, and remote management remains very much relevant. The CDL equipment range stands out as the most technologically advanced to meet these trends; its reliability and ease of use ensure there is no compromise in maple syrup quality. With many maple producers among our employees, CDL benefits from hands-on field expertise, dedicated to designing technologies that truly meet the needs of the industry. Our attentiveness and close relationship with our clients enable us to develop and improve our products to continuously better meet their needs. We are committed to keeping you informed about every detail that could make a real difference for you in the long term.

In closing, our commitment to you is to continue offering an innovative product range at fair prices for all producers, along with comprehensive regional support services provided by our field experts. Quality, reliability, and respect for delivery timelines remain top priorities for the entire CDL team.

We wish each of you a bountiful 2025 sugaring season, filled with wonderful moments shared with your teams and families!

Happy reading!

**WHITE SPOUTS,
7% BETTER PERFORMANCE**

ACCORDING TO A STUDY FROM THE ACER CENTER

When comparing sap yield, the white Maxflow spout gave a **SAP VOLUME 7% HIGHER** than the black Maxflow spout.

CONCLUSION OF THE STUDY

In the studied sugarbush, white spouts gave a higher volume of sap compared to the black spouts.

This increase, recorded in the last part of the season, would be related to the color of the spout and its thermal absorption properties.

BETTER GRIP ON TUBING!

The line of **5/16" Maxflow fittings** was specifically designed and developed for maple producers wanting to operate **over 25 in-hg (high vacuum)**. These fittings enable a perfect seal with a vacuum level beyond 25 in-hg and offers the following advantages:

- > No parting lines on the first barb.
- > Precision moulding.
- > Eliminates micro-leaks caused by molding lines.
- > Better grip on the tubing.

PRACTICAL TIPS FOR SETTING UP 3/16" GRAVITY TUBING!

- Minimum 3-5% slope
- The steeper the slope, the better the vacuum
- The weight of the water column in the 3/16" line creates the vacuum
- The system must be 100% airtight
- Keep lines as straight as possible
- Approximately 25 taps per 3/16" line
- Material cost is about \$5 per tap
- 3/16" tubing is not compatible with a vacuum pump setup!

heRO INTELLIGENT VS REMOTE CONTROL

If your model is Intelligent, you will automate and manage 100% remotely all the features of your concentrator according to the defined parameters.

If your model is Manual, you can add control modules that allow you to perform certain functions remotely. However, this does not make it intelligent; you will have to perform the actions one after the other through the interface. This will require supervision.

WATER JACKETED CALIBRATION TANK

Calibrate and bottle your syrup easily with our brand new water jacketed calibration tank with a capacity of 130 imperial gallons.

The two 5 000 W (240 V) electric elements heat water in the double wall, gently warming your syrup to the desired temperature. The height of the tank has been designed to fill all types of syrup barrels or totes. The wheeled frame is made of stainless steel. This water jacketed tank kit includes an electric diaphragm pump, a water thermometer, a water and syrup level gauge, and an air agitation system. The Brix reader (optional) will give you greater precision and consistency in the Brix level of your syrup.

This system, inspired by large operations, is now accessible to everyone!

CDL'S COMMITMENT

The background of the entire page is a photograph of three maple syrup bottles in a forest. The bottle in the foreground is large and shaped like a maple leaf, filled with golden syrup. Behind it are two smaller bottles, one round and one more traditional. The forest has bare trees and a hint of snow on the ground.

CDL wishes to remain a leader in the maple syrup industry and offer to its customers a range of innovative products and comprehensive services, with a focus on quality and compliance with delivery times, and at the right price.

At CDL, our commitment is to offer you the best customer experience in regions all year round, especially when you need it most: during sugaring season.
