Upcoming Events at CDL Save the date!

IN VERMONT | St. Albans

Friday April 28 and Saturday April 29, 2023 Open House Event

Customer Appreciation days will take place at your local store. Details coming soon!

IN CANADA | Bellechasse, Quebec

+ NEW

Friday May 18 and Saturday May 19, 2023 Inauguration of the new CDL Technology Center

End of Season Customer Appreciation Lunch and Sale in our various stores. Details coming soon!

Take advantage of our promotions the whole month of May!

Dear customers,

With the record 2022 sugar season and the addition of 7 million taps in Quebec by 2024, there's no need to tell you that we are working very hard at CDL right now. Although CDL is experiencing the same supply and labour issues that all manufacturing companies are facing around the world, we will be able to deliver your equipment on time and provide you with the same outstanding service you've come to expect from us.

We also have some positive news for 2023: we anticipate greater price stability. We are aware that the last two years have been difficult in that regard. Equipment and production costs in maple syrup production have skyrocketed, but the price of maple syrup didn't follow. We believe that part of the solution lies in innovation and the use of new technologies to increase your productivity and decrease your operating costs. CDL certainly has the team and the expertise to support your business through this essential technological shift, no matter the size.

In addition, innovations are still very much on the agenda at CDL. We believe that energy conservation and the shift to renewable energy will be a big part of our industry in the next decade. This vision has led CDL to develop a range of equipment perfect for this transition. Our new family of concentrators; our line of Master chip, pellet, wood, and now 100% electric evaporators; and our CDL Intelligence system are by far the most advanced technologies in the industry to help maple syrup producers achieve this goal.

Finally, the CDL team would like to wish you a wonderful sugaring season. Thank you for your loyalty. We look forward to seeing you soon in one of our North American stores. We are pleased to have the privilege to accompany you all in your 2023 projects.

From left to right:

Vallier Chabot, co-owner and general manager of CDL

Martin Chabot, co-owner and general manager of CDL USA

Marc-André Chabot, co-owner of CDL and vice president or R&D

2023

By Christian Gosselin Product Manager – Forest Division

CHOOSING THE BEST SPOUT FOR YOU!

Have you ever found yourself in one of our CDL store, standing in front of the spout display wondering which model you should choose for your maple sugaring endeavours? Here a few tips! They also apply if you're using buckets rather than tubing.

As a reminder, spouts are the starting point of your harvesting system, so it's no surprise that a bad tap or spout can have a catastrophic impact on your results!

Throughout the years, CDL has always invested in research and development in order to offer high-performance products. We're attentive to our customers' feedback and strive to create the best spouts on the market.

COLOUR AND TRANSLUCENCY

Let's start by looking at some basic principles. A study by the Centre ACER¹ in the spring of 2013 and 2014 showed that white spouts yielded 7% more sap than black spouts in the studied sugarbush. This variation is due to the spout's colour and its thermal absorption properties.

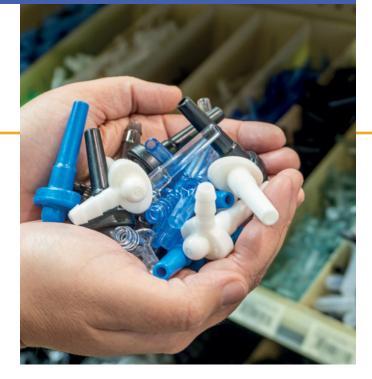

A spout's colour can therefore compensate for temperature fluctuations in your sugarbush. For example, if your sugarbush is cold or if an area receives less sunlight, your taps will thaw more quickly during the day if you use black spouts.

Translucent spouts have the advantage of allowing you to see air bubbles, and therefore leaks, at a glance. Consider using blue translucent spouts as an in-between and smokey grey spouts if your sugarbush is cold.

Some producers also use different colour spouts in different areas, allowing them to control the quality of their tappers work. Each tapper working with a different colour, it's easy to see who did what, and if someone needs a few pointers on their tapping method.

LIFESPAN

The spouts available on the market can be divided into three categories: permanent spouts, like our Maxflow line; one-year seasonal ("disposable") spouts, like our Signature and our new SMART lines; and three-year seasonal spouts, like our Signature 3 line. Your choice should depend on how often you want to change your spouts, as well as the optimal vacuum level of your tubing network.

Why change spouts every year? Nothing beats new spouts for maximum performance, and changing them assures you they're free from damage and bacterias. Using disposable spouts also ensures an optimal seal whereas with reusable spouts, the seal degrades more each year as the spouts are inserted and removed. But no matter the type of spout, watch out for micro-leaks: they're invisible to the naked eye, yet will drastically reduce your network's vacuum level. As for permanent spouts, they have a very long lifespan as long as they aren't damaged by tappers or various forest creatures. If you're not up to changing your spouts every year just yet, our Signature 3 line is a good compromise that will give you a solid return on investment at a lower cost.

CONDITION OF YOUR MAPLES

When choosing a spout, you should also consider the condition of your trees and their healing process. Smaller taps heal faster, consider a 1/4" or 17/64" spout rather than 5/16" if your maples have seen better days and have many wounds from the past seasons.

You should also consider the thickness of the bark.

PROGRESS OF THE PROJECT

If you're just starting to tap a virgin forest, you can use any equipment you like. However, if you already set up a tubing network in part or in all of your sugarbush, you need to know what equipment you're currently using and make sure your new spouts are compatible with your existing fittings, reducers, and adapters, not to mention the drill bit size you have on hand.

We hope these tips make it easier to choose your next spouts!

¹ Reference: Évaluation de la coulée obtenue à l'aide du chalumeau MaxFlow, Centre ACER, Saint-Hyacinthe, Quebec, 2014.

MAXFLOW SPOUTS WITH BARBS

1		Ţ	
		\bigcirc	
	Black	White	Blue
5/16"	66090516	66090517	66090518
17/64"	66090514	66090515	66090513

Note : we recommend the use of a 19/64" drill bit for Maxflow 5/16" tapping.

DID YOU KNOW? WHITE SPOUTS, 7% BETTER PERFORMANCE

ACCORDING TO A STUDY FROM THE ACER CENTER

When comparing sap yield, the white Maxflow spout gave a **SAP VOLUME 7% HIGHER** than the black Maxflow spout.

CONCLUSION OF THE STUDY

In the studied sugarbush, white spouts gave a higher volume of sap compared to the black spouts.

This increase, recorded in the last part of the season, would be related to the color of the spout and its thermal absorption properties.

BETTER GRIP ON TUBING!

The line of **5/16" Maxflow fittings** was specifically designed and developed for maple producers wanting to operate **over 25 in-hg** (high vacuum).

These fittings enable a perfect seal with a vacuum level beyond 25 in-hg and offers the following advantages:

- > No parting lines on the first barb.
- > Precision moulding.
- Eliminates micro-leaks caused by molding lines.
- > Better grip on the tubing.

SANITIZING CAPS - PERFECT FOR SPOUT SANITATION

THIS CAP FITS ON 5/16" HEALTH Is

Light green 5/16" end cap insert

This product allows you to hang 5/16" Signature spouts or Maxflow 5/16" or 17/64" spouts to sanitize with isopropyl alcohol.

66030517

Clear blue 1/4" end cap insert

This cap fits on 5/16" health Ts and allows you to plug 1/4" signature, smart or 17/64" Maxflow spouts.

66030519

66030518

Universal reducer Maxflow cap

This product fits over the T plug Cap or an End of Line Adaptor.

The Universal Reducer MaxFlow Cap allows the insertion of our 5/16" or 1/4" Signature spout. It can also fit any of the spouts from the CDL product line, whether it's 5/16", 1/4" or 17/64".

This product was designed with a malleable material to have very good retention and to be tight under high vacuum. It gives the opportunity to customers using permanent spouts to make the transition to the Signature spout without changing the entire drop.

CDL EXPERTISE: WE CAN MANAGE YOUR MAPLE SYRUP PROJECTS FROM A TO Z.

DID YOU KNOW THAT THE CDL TEAM IS HERE TO MEET ALL OF YOUR NEEDS?

HERE IS THE LIST OF SERVICES WE OFFER. ASK YOUR STORE OR YOUR CDL REPRESENTATIVE!

> Project evaluation

Have your project fully assessed by our experts, who have access to a large inventory in real time. Whether you are beginners or experienced, you will be accompanied by our experts according to your needs.

> Maple syrup and technical advice

Take advantage of the advice of our experts to calculate the pipe sizing and discharge calculation.

> GPS mapping

Optimize the strategic positioning and planning of your equipment using GPS technology.

> Installation of mainlines and tubing

Take advantage of the industry's best practices and ask our experts to install your mainlines and tubing in your forest.

> Equipment rental

Rent an Electrofusion welder or a SpinSeal welder for your one-time installation needs. Verify with your CDL branch to find out if other equipment is available for rental in your region.

> Assembly of drop lines

Make your life easier with our drop line assembly service! Available in every CDL store.

> Implementation of the CDL Intelligence

Get advice from our experts on our Maple Sugaring Management System. Our team will assess your needs and guide you step by step on its installation in your sugarbush.

> Turnkey installation of equipment

When making your purchase, ask our experts to deliver and do a complete installation of your CDL equipment directly to your sugarhouse.

> Repair at the sugarhouse

Start maintaining your equipment before the start of the sugar season! Our team will come to your sugarhouse to repair your electrical, welding, plumbing, start-up and burner adjustment problems, for any brands.

> Modification of equipment

Request custom adjustments if you have specific needs.

> 24/7 assistance during the sugaring season

During the sugaring season, our team is available 24 hours a day, 7 days a week to respond to your emergencies.

#### **TAPPING ACCESSORIES**

cdlinc.ca | cdlusa.com

## MAPLE LOLLIPOPS **20 PORTIONS**

Ingredients

- > 1/2 cup unsalted butter, at room temperature
- > 1 cup maple syrup (preferably very dark syrup for its strong flavour)
- > 20 lollipop sticks

Source : Maplefromcanada.ca

#### Method

- 1. In a thick-bottomed saucepan, bring butter and maple syrup to a boil. Boil until candy thermometer shows 146 °C (295 °F), then remove from heat.
- 2. Lay a large sheet of parchment paper on a table or countertop, then pour little circles of syrup.
- Quickly place a lollipop stick in the centre of each circle, 3. then leave to harden.

Store lollipops in an airtight container in a cool and dry place.

## MAPLE FUDGE **16 PORTIONS**

#### Ingredients

- > 2 cups maple syrup (prefertably dark syrup for its robust flavour)
- > 1 cup 35% cream (preferably whipped)
- > 1/2 cup walnuts, chopped

Source : Maplefromcanada.ca

#### Method

- 1. In a large saucepan, bring maple syrup and butter to a boil. Boil for 5 minutes.
- 2. Add cream and continue cooking until the temperature reads 118°C (245°F) on a candy thermometer*.
- Meanwhile, grease and line a square pan with parchment paper 3. and set aside.
- 4. Remove maple syrup and cream mixture from heat and let rest for 5 minutes.
- 5. Using a whisk, beat for 5 minutes until thick.
- 6. Add walnuts and pour into baking pan.
- 7. Let cool before cutting into squares.

*The candy thermometer is essential for this recipe.

- > 3 tablespoons butter

## PRECISION TAPPER

# Your sugaring operation's intelligence

# LET CDL INTELLIGENCE DO THE WORK FOR YOU!

The CDL Intelligence system gives you 24/7 real-time access to your sugarbush's key data so you can better understand your performance and ultimately boost your profitability.

Choosing CDL Intelligence means choosing a simple, reliable, and stable system that will help you:

- Understand your sugarbush's situation in real time
- Make sure your pumping stations are working properly
- > Get the most out of your equipment
- Take control remotely as soon as a problem arises
- > Save time and money

CCDL INTELLIGENCE MAPLE SUGARING MANAGEMENT SYSTEM

**CDL Intelligence**, a sugarhouse management system that allows the complete automation of systems and processes.

From surveillance to absolute control and automation of the systems of your sugaring operation, **let CDL intelligence do the work for you!** 

Easy to install, easy to use

Quick return on investment Boost production by at least 1/2 lb per tap while reducing labor costs

Automatic remote updates

CDL maintenance and technical service

# HERE ARE THE FEATURES YOU'LL HAVE AT YOUR FINGERTIPS WHEN YOU CHOOSE A CDL INTELLIGENCE SYSTEM:

- Satellite overview of your sugarbush and tubing with a satellite map (KML/GPS/GPX)
- > Detection of leaks and loss of vacuum in the sugarbush
- > Remote vacuum control and start/stop
- > Pumping station monitoring
- > Tank level monitoring
- > Remote valve and pump start/stop
- Temperature-based vacuum and drive adjustment
- > Continuous flowmeter and Brix readings
- > Integrated communication with Intelligent RO
- Support for multiple communication gateways (remote and not)
- Remote cloud-based access from your computer, tablet or smartphone

- > Notifications on your smart phone or tablet
- > Day and night infrared camera surveillance
- > Automation of many repetitive daily tasks
- Ability to have multiple users with different levels of control
- > Time and employee task management
- > Geolocation of employees in the woods
- > Control and protection module for pressure pumps
- Control and protection for manual RO

# WISENESH

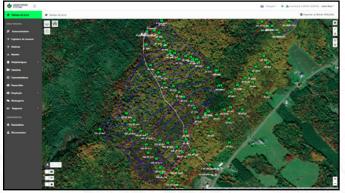

## SMART MAPLE PRODUCTION NETWORK

# THE ONLY INTELLIGENT NETWORK DEDICATED AT 100% FOR MAPLE SUGARING, TOTALLY DEVELOPED BY CDL.

Your CDL Intelligence system is supported by the CDL Wisemesh network. The experience acquired with the thousands of installed sensors allows us to offer **the only maple sugaring intelligent network on the market**.

#### **STARTER KIT**

KIT INCLUDES:

- > 5 single vacuum sensors
- > 1 gateway
- > 1 controller (mini-pc)
- > 1 HD monitoring screen
- > 1 wireless mouse + keyboard

Possibility to add-on to your needs over the years.

21090-EN

#### **OUTDOORS**

#### Vacuum sensor (single)

A Remotely measure the vacuum in one master line and see the ambient temperature in the woods. Batteries recharged by solar power.

#### Vacuum sensor (double)

B Remotely measure the vacuum in two master lines and see the ambient temperature in the woods. Batteries recharged by solar power. SE100-V

SE100-V-2

#### Communication gateway V2

- C
   Ensures that information is transmitted between the wireless vacuum sensors and the control hub.
   SG100-V2

   Qi wireless charger and AC/DC adaptor PG200 assy
   22201A
- Induction charger for the portable gateway.
   V2 antenna deportation kit (20 ft)

21072

#### **INTERFACE**

#### **CDL** Control base

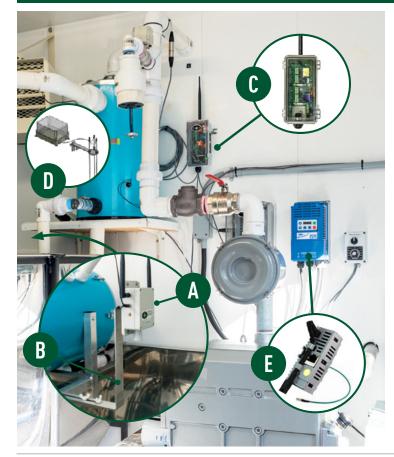

Microcomputer required to run your CDL Intelligence system on your devices (computer, tablet, smartphone).

21082A

#### **PUMPING STATION**

#### **PUMP SAFETY MODULE**

# Avoid losses and be notified if a problem arises.

Safety box for local booster water pump only	521252

Safety box for local booster water pump + monitoring

#### Tank level sensor

^	See the levels of sap or concentrate remotely, in real time. You can also receive alerts when	SA100-HT
	the water or concentrate reaches a certain level.	

#### Tank level sensor holder

B Allows you to mount your tank level sensor at the correct distance from the tank walls for a better reading.

#### Multifonction controller (in/out)

Includes two inputs and two outputs.
C Allows for max 240 V/10 A valve modulation SE200-M2
and/or dry-contact on/off.

New and ultra-compact design. Works with Wisemesh only.

#### Tank level sensor kit with probes

Provides automatic control of pressure pumps.

#### **Communication module**

Can be added to the phase converter for LENZE 21206 vacuum pumps to manage RPM based on the outdoor temperature.

#### ESSENTIAL FOR YOUR WATER PUMPS PROTECTION

Pump safety module that can easily be integrated to CDL Intelligence maple sugaring management system.

Emergency stop water pump within seconds when desired parameters are not met (minimum pressure, maximum pressure).

Linked with CDL Intelligence, the system will send an alert on your cell phone if a problem occurs.

Operator is also able to consult remotely the status of any pump systems.

- > Waterproof plastic enclosure
- > 110V power supply

521256

> 1/4" MIPT pressure probe included (to be installed on the discharge line)

#### **TESTIMONIAL**

#### - Maxime Poulin,

GOLD SUGAR BUSH INC. - Seboomook Lake, Maine - 92,000 taps

#### **PUMPING STATION (CONTINUED)**

#### NANO CDL CELLULAR SURVEILLANCE SYSTEM

With the NANO CDL cellular surveillance system, control remotely your vacuum pump through your smart cell phone.

#### Eliminate useless steps and revenue losses with this affordable new product!

SPECIAL INTRODUCTORY PRICE. FIND OUT ABOUT IT! Compatible with every 120 Volts AC vacuum pumps. Possibility to add a 24 Volt AC relay for other types of pumps.

#### The NANO CDL system can manage:

- > Start/Stop pump
  - > Manual
  - > Temperature activation
- > Outside temperature readout with calibration at 32°C and 212°C for better accuracy.
- > Real time vacuum readout
- > Tank level warning and automatic turn off
- > Automatic and off-site program updates
- > LTE network
- > Requires cellular coverage by one of these suppliers:
  - > Canada : Rogers, Bell, Telus
  - > USA : AT&T, T-Mobile

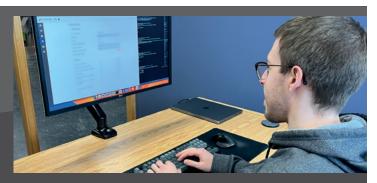

#### About the app.:

- > Android or Apple
- > Can manage one or many NANO CDL
- > Operation and configuration easy to manage
- > Notifications on your smart phone
- > Multi-users with 3 different access levels
  - > Visualize: To see information and receive alarms
  - > Control: Visualize + modify and control parameters
  - > Admin: Control + manage users

21090-NANO

#### Check on the packages offered by CDL!

Remote support and installation services throughout the USA and Canada for peace of mind.

#### **PUMPING STATION (CONTINUED)**

#### **FLOWMETERS**

#### **CDL ULTRASONIC FLOWMETER**

- > To measure flow per minute and the total quantity of liquid. Works positively and negatively. Possibility to reset to zero.
- > Important: This type of flowmeter cannot be used on the outlets of vaccum extractors. Ideally, these flowmeters should be used at the outlet of a vacuumless transfer pump.
- > Maximum pressure 150 psi.
- > Easily connects to the CDL Intelligence system (monitoring).

1" RS-485 MESH	210100U	
1-1/2" RS-485 MESH	210150U	
2" RS-485 MESH	210200U	
3" RS-485 MESH	210300U	

#### **CDL ROTARY FLOWMETER**

- > To measure flow per minute and the total quantity of liquid. Works positively only. (installation of a check valve is recommended. Possibility to reset to zero.
- Recommended for applications under vacuum (ex: coming out of an extractor). Works on 24 volt with a transformer included. Maximum pressure 150 psi.
- > Easily connects to the CDL Intelligence system (monitoring).

1" RS-485 MESH 2.5 - 79 GPM	210100
1-1/2" RS-485 MESH 6.5-225 GPM	210150
2" RS-485 MESH 10.5-357 GPM	210200
3" RS-485 MESH 24-739 GPM	210300

#### **MOTORIZED VALVES**

Use the CDL Intelligence system to remotely control tank drainage valves, discharge tubing, and extractors in remote pumping stations.

120 V   ON/OFF 1-1/2" ferrule	668408S	
120 V   ON/OFF 2" ferrule	668409S

120 V   ON/OFF 4" ferrule	668412S	(FFT
		hat 1

#### 4.0 MEGAPIXEL PAN & TILT WIRELESS IP CAMERA

### EASILY FOLLOW REMOTELY THE KEY OPERATIONS OF YOU SUGARBUSH

#### **AVAILABLE NOW!**

#### AFFORDABLE, STYLISH, INTUITIVE, EASY SET UP!

Unpack, install and configure your camera YOURSELF without any technician in LESS THAN 5 MINUTES. Thanks to the integrated step-by-step voice assistant!

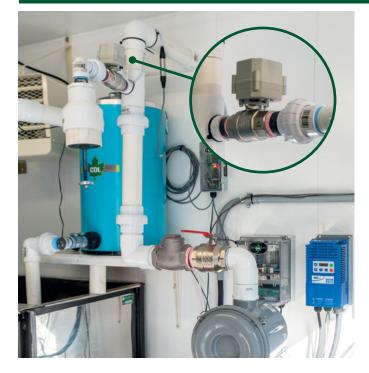

#### Operates using the CDL Intelligence app.

- > Very good value for money
- > Easy to install
- > Day and night vision covering up to 33 feet
- > Remotely tiltable panoramic field: wide angle over 355 degrees horizontally and 120 degrees vertically
- > Programming of 16 predefined positions
- > 13 infrared LED lights
- > Works with either ethernet or 2.4/5GHz Dual-Band WiFi networks

20210

#### **PUMPING STATION (CONTINUED)**

#### VACUUM REGULATING MODULATING VALVE

# CDL MONITORING SYSTEM OPTION FOR REMOTE VACUUM MODULATION

#### **ADVANTAGES :**

- > Improve vacuum management to prevent premature mainline freezing when temperature are close to 0 °C
- > Energy saving when the system is frozen or during the night when the sap is running very little
- > Better vacuum management. Can allow quicker sap flow at the beginning of the day for systems that are not tight

668409

Vacuum regulator and plumbing not included.

# **EMPLOYEE MANAGEMENT MODULE**

#### MANPOWER MANAGEMENT OF YOUR SUGARING BUSINESS CAN NOW BE DONE WITH THE CDL INTELLIGENCE SYSTEM!

#### FROM THE WEB INTERFACE, THE SYSTEM ADMINISTRATOR CAN:

#### > Multi-user management, with different levels of access:

- > Visualization of cameras
- > Equipment control
- > Access to production reports
- > Access controlled by employees

#### > Build personalized reports on employee tasks, for example:

- > Who did the work
- > Date the work was done
- > Time spent on the task
- > Apply filters on employees, the type of work, the period, etc.

#### > Build timecard reports

- > Filter by employee or period
- > Simplify pay management by getting the time for each employee for a period

#### > Detailed view of timecards

- > Day by day time entries detailed by type of task
- > Filter per period

#### FROM THE MOBILE APP:

- > Log employee displacements
- > Time card: Start/stop the stopwatch and possibility to specify the task

# Image: state state

THIS BRAND NEW MODULE CAN MANAGE THE DAILY ROUTINE FOR YOU. FOR MORE DETAILS, CALL YOUR CDL SALES REPRESENTATIVE.

#### CDL IS THE ONLY MAPLE COMPANY THAT HAS A TELECOMMUNICATIONS SPECIALIST WITH MANY YEARS OF EXPERIENCE IN:

- > Installation of the CDL intelligence system
- Sale, installation and configuration of computer systems
- > Sale of fiber optic systems
- Sale and installation of cameras
- > Telecommunication by antennas
- > Automation
- > Networking

Martin Berube, telecommunications specialist at CDL

#### HORIZONTAL EXTRACTORS WITH SUBMERSIBLE PUMP

#### **ADVANTAGES**

- > No sap-return in the 5/16" tubing;
- > High quality submersible pump;
- > Pump adapted to pump up water;
- > No air in the tubing system while extracting sap;
- Solves the sap extraction problems caused by pumping at high vacuum;
- > No float, extremely reliable;
- > Straight sap entry;
- Pump within or outside of the pumping station (2 available options);
- Now pre-tapped to receive the self-cleaning sprinkler in option – 72000201
- On request configuration to pump within the pumping station or outside

# CDL HIGH VACUUM SAP LIFTER KIT

THE NEW OPTION TO SOLVE FREEZING, MECHANICAL AND LEAK PROBLEMS IN A REVERSE SLOPE APPLICATION.

SCAN TO SEE THE VIDEO bit.ly/cdlvideos

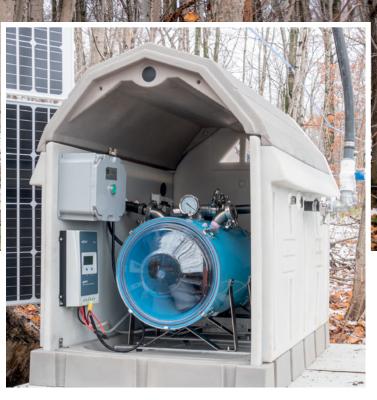

This equipment is used to lift sap from one pipe to another sloping down to a pump station. The system can lift sap up to 20 or 33 feet of elevation depending on model.

- Access the inside through a small or a large door in the front
- Continuous heating to prevent freezing
- Mainlines entry completely reversible

#### **INCLUDES:**

- > High quality insulated plastic shelter.
- > Reliable system using a submersible pump
- > Quick connect electrical components
- > 1 foldable (in 3 sections) solar panel for easy transportation and installation, giving 300 watts of charging capacity. (solar model)
- > 2 batteries (solar model)

#### **AVAILABLE MODELS:**

**12 V solar model** 200 to 700 taps*. Heating with a safe propane pilot (propane tank not included). 73800012V1P

#### 230 V Electric models

Heating with a ceramic heating element (75W 220-240V).

From 300 to 1,000 taps*	From 600 to 2,000 taps*	From 275 to 875 taps*
1 pump	2 pumps	2 pumps 280 GPH in series
7380002301P	7380002302P	7380002302P-HP

* Depending on the model of your application, the discharge height, the level of vacuum and the model chosen.

#### **TESTIMONIAL**

I use the sap lifter throughout the entire season for my 400 taps where it's harder to get sap because of the incline. I enjoy working with my elevator. It doesn't freeze, it's easy to use, and it only needs propane for heating. Plus, its submersible pump barely lowers my vacuum compared to my old model, which backed up all my front lines.

I used to have to go check my lifter every morning to make sure it wasn't flooded. Now I don't have to go as often. I just have to go when I have a minute to make sure there's enough propane.

The much more efficient system means I save time and money every spring. For me, this investment was a must-have as soon as it was put on the market and I don't regret it one bit. I've been using it for three springs now.»

## CHOOSE A HIGH VACUUM PUMP : THE BEST INVESTMENT FOR YOUR BUSINESS!

#### WE DID THE MATH!

- > Go from 25 to 29"Hg of vacuum and increase production by 20%
- > Go from 3,5 to 4,2 lb per tap gives:
  - + \$9 625 (\$7 000 USD) of revenue / year for 5,000 taps
  - + 19200 (14000 USD) of revenue / year for 10,000 taps
  - + \$57 750 (\$42 000 USD) of revenue / year for 30,000 taps

#### A 1 YEAR RETURN ON YOUR INVESTMENT!

#### DRY SCREW VACUUM PUMPS

#### **ADVANTAGES**

- > Very performant and stable
- > 100% oil-free pump with a design that complies with regulatory hygiene principles, for risk-free food safety
- > Robust design with corrosion free materials
- Air-cooled without oil or water allowing operation at low vacuum without damaging the pump
- Zero friction, minimizing amperage required for consistent efficiency
- > Principle of dry and robust screw very resistant to the ingestion of liquids
- > Withstands water vapor (moisture) just as much as liquid water, so no need for a moisture trap
- > Simplicity of installation and operation
- > Reduced maintenance requirements
- Reduced noise level, silent operation without rattling or high-pitched noise
- > 230/460 volt three-phase motor

# CDL VERTICAL SILOS

# SPECIFICALLY DESIGNED FOR SUGARING NEEDS

Superior quality, CDL fabrication in brushed stainless steel

Reinforced urethane insulated base with anchor points

Sloped bottom for complete drainage

Available sizes:

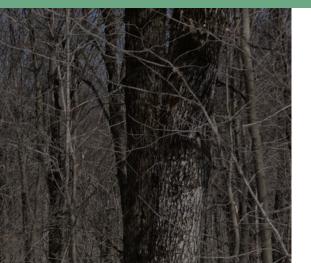

8 foot diameter: Height of 7.5', 10', 12.5', 15', 20' and 25'

**12 foot diameter:** Height of 10', 15', 20' and 25'

#### **INCLUDES:**

- 360° rotating spray ball
- Manhole at the bottom
- Water inlets (1 from bottom and 1 from above) and outlet 3"
- Air vent with screen for venting without > bugs or any undesirable debris

#### **OPTIONAL:**

- > Manhole on top
- Ladder and platform following all the safety standards in Canada and the United States
- Protection cage for ladder >
- Many pump models available for spray balls > (piping and connections extra)
- Pressure transmitter, temperature > transmitter and level indicator through the CDL Intelligence system
- > Cage to link building to silo
- > Stainless steel top feed plumbing
- Stainless steel supply plumbing for rotating > spray ball

# **ULTRAFILTRATION** Be a part of the next innovation in maple sugaring

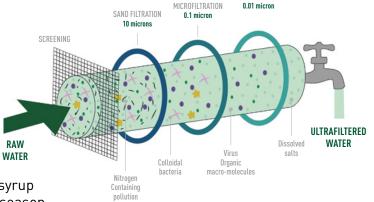

# TECHNOLOGICAL ADVANCEMENT OF FILTRATION

- Eliminates all bacterias and yeast present in the sap;
- Increases preservation time of sap and concentrate at room temperature;
- Reduces sap waste after long distance transport;
- Produces pure and clear sap;
- Essential for maple syrup producers that want to bottle maple sap;
- Can be used to prevent production of stringy maple syrup when the days are warm during or at the end of the season.

# CDL quality standards and simplified operations

- Designed and made for very fine filtration of maple sap, birch sap and concentrate
- Eliminates bacteria, yeast and other organic particles from liquids
- Improves sap and concentrate preservation time

# CDL pH NEUTRALIZATION SYSTEM

## REDUCES THE IMPACT OF THE DISCHARGE OF WASH WATERS IN THE ENVIRONMENT

- Simple, economical and efficient design
- The system makes it possible to meet the state regulations on wastewater discharge in maple syrup industry
- Design with 2 pH probes to reduce the volume of water to be treated and the quantity of neutralizing agents (acid and basic)
- Control at your fingertip with HMI touchscreen
- Automated and autonomous functions
- Complete control of the system pH probes, valves and pumps
- Programmable operational parameters
- Wall installation of the control box or optional stainless steel tripod
- Variable capacity recirculation pumps and neutralization tanks options (not included with basic system)

LA FENDEUSE CLASSIC AND DELUXE

## **REMOTELY CONTROL** YOUR CURRENT RO FOR AN AFFORDABLE COST!

Add an affordable module to control your current system at your fingertips, no matter which model you have or which company it's from.

Here's what it can do:

- > Start/stop the system
- Operate tank valves (sap and permeate)
- > Direct concentrate and filtrate to tanks or other locations
- > Manage pressure and concentrate flow
- Read input pressure and turbine high pressure
- Read permeate or concentrate flow rate
- > Read incoming and outgoing Brix
- > Read temperature

# It's a small investment and simple to use!

It's even available for mini ROs! Contact our team to upgrade your current equipment and make your life easier!

CDL

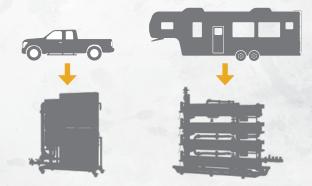

# CDL IS THE ONLY ONE IN THE INDUSTRY TO ALLOW YOU TO CONFIGURE YOUR CONCENTRATOR THANKS TO ITS NEW 100% MODULAR FAMILY!

#### **NOTHING IS EASIER!**

#### CHOOSE FROM OUR 6 MAIN UNITS AND OUR 24 RO POST CARTS AVAILABLE!

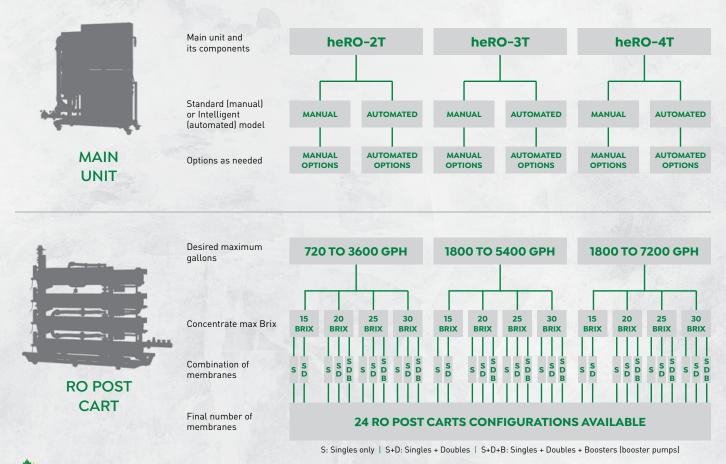

This flexibility in configuration will allow you to meet the current and future needs of your sugarbush while respecting your budget! Your concentrator will be scalable even when adding taps.

Let's make a comparison with recreational vehicles. Our competitors offer motorhomes, while at CDL, we now offer you the possibility of choosing your truck (main unit) and your "fifth wheel" (RO post cart)!

By continuing with this comparison, you can:

- Get a new main unit and a new RO post cart;
- Keep your current head unit and change your RO post cart;
- Change your main unit and keep your current RO post cart.

# NEW hero-2T CDL CONCENTRATORS: NOW 100% MODULAR!

Available in STANDARD (manual) or INTELLIGENT (automated) models

**Photo: Model heRO-2T Intelligent** 

Model appearance may vary.

# CONCENTRATE FROM 1.5 BRIX TO 30 BRIX IN ONE PASS, EVEN AT THE END OF THE SEASON!

#### heRO INTELLIGENT VS REMOTE CONTROL

If your model is Intelligent, you will

automate and manage 100% remotely all the features of your concentrator according to the defined parameters.

If your model is Manual, you can add control modules that allow you to perform certain functions remotely. However, this does not make it intelligent; you will therefore have to perform the actions one after the other through the interface. This will require supervision.

A WIND OF CHANGE IS BLOWING THROUGH THE MAPLE SYRUP INDUSTRY! GET OUR BRAND NEW 100% ELECTRIC AND AUTOMATED EVAPORATOR:

## THE MASTER-E!

#### Front view. Evaporator appearance may vary.

#### 100% electric and automated:

- Preheating with product recirculation
- Automatic steam compressor activation
- Evaporation with continuous concentrate feed and syrup output
- 100% sugar recuperation (desugaring)
- Automatic wash & rinse (no more scrubbing)
- Unmatched energy efficiency
  - Works on renewable energy
- Contains a very small volume of syrup when compared to traditional evaporators

The Master-E evaporator is a new concept in the maple industry.

The Master-E combines electric energy with the high efficiency of steam compression while evaporating under vacuum.

#### GRANTS

Covernment energy saving grants may be available in your state or province for the purchase of high efficiency energy saving electric evaporators!

The concentrate is preheated before the evaporation stage. The preheating stage is quick due to low liquid volume contained in the evaporator. A small electric steam generator generates the necessary heat. Once proper liquid temperature is reached, the steam compressor is automatically activated, steam pressure and temperature rise and generate evaporation. After a few minutes, when liquid temperature has stabilized the boiler shuts off and doesn't come on again. Necessary heat is only produced by compression of the liquid evaporation vapors.

Heat from condensate is transferred to cold sap feed and nearly all the energy is recuperated. Cold condensate output from plate heat exchanger is discarded to drain.

No evaporator on the market can match the efficiency of the Master-E!

#### **INSTALLATION**

 Compact design. No smoke stack is needed. Evaporator dimensions: 54 ft² (118''x 66'') Compressor dimensions: 17 ft² (70'' x 35'')

N.B.: Building requires 12.5' ceiling clearance for the installation and a 8.5' door for the delivery

 Compressor may be installed to the right or behind the evaporator

#### MAINTENANCE

- Constant product circulation contributes to low niter accumulation on the heating tubes
- No scrubbing or tube replacement
- Can operate long continuous hours without stoping
- Easy maintenance, thanks to an automated wash and rinse cycle
- Quick drainage
- Requires little maintenance
- Reliable and sturdy construction

#### **OPERATION AND PERFORMANCE**

- Production capacity:
   2.5 barrels/h (100 US Gal./h., concentrate feed of 30 Brix or more)
- Lowest production cost: \$2,75 (CAD)/40 US Gal. barrel (based on \$0,10/kW energy cost)
- Safe and efficient
- Simplified functionality and easy start up
- Works under vacuum
- Fast preheating sequence (45 min) because of the steam generator
- Very safe, runs very low steam pressure
- High quality maple syrup production
- Continuously constant Brix syrup production
- Very flexible to allow the operator to boil a sap or concentrate at any Brix.
   Very effective at High Brix ≥ 30 Brix
- Very low volume of liquid in the evaporator (less than 20 US gallons)
- 100% automated for better efficiency over a long period of operation
- Automatic and management of product Brix output
- Very high energy efficiency, low steam loss

#### **POWER REQUIREMENT**

## **AVAILABLE SIZES:** 3' x 11' to 7' x 18'

# THE MASTER OF EVAPORATORS

## FOR THE FOLLOWING REASONS:

- Rugged and quality construction
- → Energy efficient
- → Easy to operate
- → Boiling stability
- Boiling conditions adjustment and flexibility from 2 to 35 Brix
- Longer boiling time without pan change
- Flavor and authenticity of maple syrup
- → Evaporation performance
- → Energy costs / labor per barrel
- → Easy cleaning

#### **AVAILABLE OPTIONS:**

- > Syrup flow reverser
- > Double pass flue pan
- > Syrup drip tray
- > Multi-pass syrup pan
- > Permeate or concentrate preheater
- > Mechanical or electrical level control
- > Control panel with 110 V electric outlet
- > Front/rear Protect-O
- > Front/Rear pan washer
- > Motorized level control (ON-OFF)

#### THE MOST ECONOMICAL ON THE MARKET!

STANDARD RIELLO BURNER Allows flame modulation between 20% to 100% to perfectly adapt the boil to your need.

Distributes the flame efficiently and more environmentally friendly.

## OIL, NATURAL GAS & PROPANE EVAPORATORS

- > Quick start and stop
- > Boiling stability, reduced operation supervision
- > Boiling modulation available depending on the burner
- > Natural gas: When available, the possibility of being connected to a gas distribution network

## UNIQUE TECHNOLOGY IN THE MAPLE SUGARING INDUSTRY.

#### **The R7 high pressure steam evaporator from CDL** allows evaporation of sap, concentrate or maple syrup from **2 to 66 Brix**.

The R7 offers **optimal control of the heat and evaporation intensity allowing great flexibility.** 

This high-tech and high performance steam evaporation system **brings unmatched evaporation per square foot power**.

Available from 25 HP to 60 HP without any certifications/license card. Power can reach up to 300 HP depending on the regulations in your area.

#### **STEAM BOILER**

- > Very low water level in pan;
- > Ultra-quick start and stop;
- > No need to change coils and cleaning directly in pan;
- > No pan change needed;
- > No risk of burning the pans.
  - CDL cdlinc.ca | cdlusa.com

#### Useful features of steam generator system:

- > Barrel cleaning;
- > Maple syrup warming;
- > Quick and efficient cooking for processing.

## HIGH PRESSURE STEAM EVAPORATOR

#### MAIN FEATURES

FUEL	OIL, PROPANE, NATURAL GAS AND GAS COMBINATION
DIMENSIONS	25 HP, 35 HP, 50 HP ET 60 HP without certifications, up to 300 HP
EFFICIENCY	Unmatched evaporation power per square foot
AVAILABLE OPTIONS	Automated washing system, steam pan and flow reverser

#### INCLUDES:

- R7 pan only includes sight glass level, draw off valve and electric valve with levato
- > Single inner coil
- > Hood with glass doors
- > Stack, roof jack& collar
- Stainless steel stand with two 120V electrical outlets
- > Delivery and start-up by a CDL technician

#### **OPTIONAL:**

- > Steam blower
- > Pan Washer
- > Steam Pan
- Sequential automated washing system for steam pans
- > LED light
- > Reverse Flow
- > Double coils
- > Thermoregulator

DELUXE

CDL's **Deluxe** oil evaporator was designed for small and medium-sized sugarbush producers.

This evaporator is very efficient and gives its owner an incomparably comfortable and stable boiling experience. This equipment is very reliable and very simple to operate. **To use it is to adopt it!** 

#### MAIN FEATURES

FUEL	OIL, NATURAL GAS OR PROPANE	
DIMENSIONS	Available in sizes: 2' x 6' to 6' x 18'	
CONSUMPTION	Perfect for small and medium producers. Hassle-free boiling stability and easy operation.	
AVAILABLE OPTIONS	Automatic draw-off valve. Syrup drip tray. Hood pre-heater. Permeate pre-filter. Steam pan. Protect-O Level controller protection	
Interchangeable and reversable sap inlet and outlet		

#### • 100% REVERSIBLE!

- Most proven evaporator in its class
- Timeless classic look
- Incomparable value for money
- Simple and reliable mechanics

Chinook

- Integrated heat recovery system that:
  - Preheats combustion air for unparalleled combustion efficiency
  - Limits energy loss by reducing the chimney temperature
- Automated combustion air management system that:
  - Simplifies the operation
  - Allows you to adjust the evaporation rate according to your needs
  - Stabilizes power throughout the charging period
- Manual air adjustment dampers allow fine-tuning combustion adjustments for optimal performance regardless of the type of wood used
- Luxury aesthetics 100% stainless steel

The most **EFFICIENT** evaporator in the range of wood evaporators with conventional evaporation pan offered by CDL

(hinook

MAIN FEATURES		
FUEL	WOOD (soft or hard)	
DIMENSIONS	Available sizes: 2½' x 8' to 6' x 18'	
CONSUMPTION	0.24 medium quality wood cord (24") per barrel (32 imp. gal - 40 U.S. gal) of syrup (15 Brix)	
IDEAL FOR	Get up to 85% energy efficiency while benefiting from automation and ease of use.	

Interchangeable and reversable sap inlet and outlet

2023

CDL cdlinc.ca | cdlusa.com

#### MAIN FEATURES

FUEL	WOOD (soft or hard)	
DIMENSIONS	Available sizes: 2½' x 8' to 6' x 18'	
CONSUMPTION	Wood consumption 40% less than a conventional evaporator	
IDEAL FOR	Balance between performance and boiling stability	
Interchangeable and reversable sap inlet and outlet		

• 100% REVERSIBLE!

InTens.().fire

- Automated combustion air management system that:
  - Simplifies the operation
  - Allows you to adjust the evaporation rate according to your needs
  - Stabilizes power throughout the wood loading periods
- Manual air adjustment dampers allow fine-tuning combustion adjustments for optimal performance regardless of the type of wood used

Ventur

#### . 100% **REVERSIBLE!**

- High evaporation capacity at an affordable price
- Superior lifespan
- Even boil: softer in front, aggressive in rear
- No need to preheat the chimney
- Full throttle in less than 10 minutes
- Good operation even in low pressure (bad wind)
- Fully reversible
- Small amount of bricks needed
- Perfect for beginners, easy to operate and very limited risk of error
- No risk of backdraft and very safe
- Adjustable boiling intensity

The new airtight high performance Venturi evaporators has a unique artificial draft system allowing the intake of primary air at high pressure by suction. It simply and safely increases the evaporation performance of the evaporator. The Venturi Performance system developed by CDL.

77

## **PERFORMANCE AND EFFICIENCY** GREATLY IMPROVED!

AUTOMATED FRONT AND

### **REAR PAN WASHER BY CDL**

#### STEAM PAN ADVANTAGES

#### Improve performance and efficiency by up to 50% without additional fuel consumption.

- > The use of the steam pan causes a significant reduction in energy consumption by reusing the steam produced by the flue pan. This reduction in energy consumption can be up to 50% depending on the Brix at the input of the pan;
- > This option can be installed on all types of evaporators (wood, pellet, oil).

#### **AUTOMATED PAN WASHER ADVANTAGES**

## A must for anyone looking to improve and simplify their operation.

- > Available as an option for Venturi, Intense-O-Fire 2, Chinook, Deluxe, Master and R7 evaporator models, the pan washer by CDL is completely automated and sequential.
- > With its complete non-contact wash and continuous washing circuit, it eliminates stubborn stains and greatly reduces the daily workload.

#### **SYRUP PAN WASHERS**

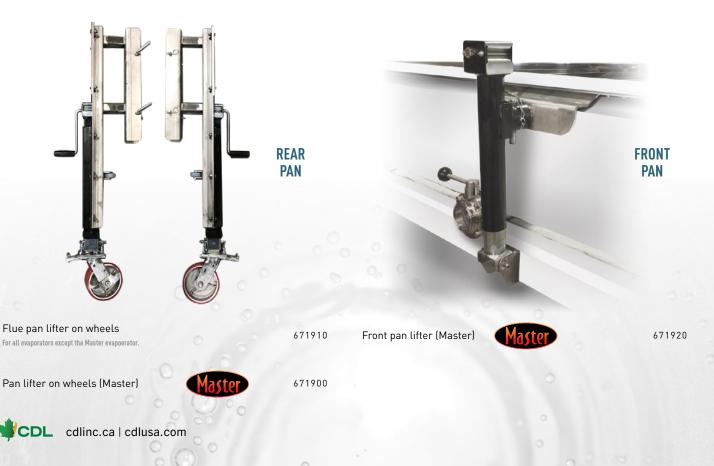

## CLEANING SIMPLIFIED!

SINGLE, DOUBLE AND TRIPLE PAN WASHERS ARE AVAILABLE IN MANY SIZES. CHECK IT OUT!

#### **FLUE PAN LIFTER ON WHEELS**

Easily move your flue pan for cleaning or access firebox for maintenance.

- $\rightarrow$  Good up to 50 taps
- $\rightarrow$  Evaporates up to 7 gallons / hour
- $\rightarrow$  Easy assembly
- $\rightarrow$  No bricking necessary

#### **INCLUDES:**

#### THE TRADITIONAL EVAPORATORS **AVAILABLE IN SIZES: 2-1/2' X 8' TO 5' X 16'**

The Traditional CDL evaporator is designed for owners of medium and large sugarbushes wishing to keep the tradition alive of boiling the syrup with firewood while being effective and efficient. This evaporator will provide an incomparable boiling stability. Its robust construction will allow many generations to experience the pleasure of boiling maple syrup.

#### **INCLUDES:**

- $\rightarrow$  32" high furnace with cast iron grates and 2 doors for wood loading.
- $\rightarrow$  1 flue pan with 7" argon welded flues.
- $\rightarrow$  2 to 3 argon welded syrup pans for finishing (depending on model)
- $\rightarrow$  Front and rear float boxes.
- $\rightarrow$  Stainless steel connections, drain valve and draw-off valve.
- $\rightarrow$  Complete chimney (twice the length of the evaporator) including the stack.
- $\rightarrow$  1 rope operated stack cover.
- $\rightarrow$  Water level on flue pan.

ightarrow Thermometer	EITC0306

Requires bricking kit 1-1/4" x 4-1/2" x 9" (not included). 670090217

The new CDL insulated syrup calibration tank has a stainless steel insulated tank and an integrated mixer.

Easy to use, thanks to a built-in washing system, a recirculation pump and a base on wheels. Simplifies and improves calibration of the syrup before filling barrels.

#### **ADVANTAGES**

- ightarrow Controlled temperature;
- $\rightarrow$  Real-time Brix reading;
- ightarrow Perfect maple syrup calibration;
- $\rightarrow$  Simplifies operation.

250 GAL.	4' x 4' x 3'	6793443
350 GAL.	4' x 4' x 4-1/2'	67934445
Insulated calibration ta	nk starter control case	6793001

#### Real-time Brix reading available in option

Homogenize syrup before filling barrels with the real-time Brix reader that can read between 5 °C and 100 °C (41 °F and 212 °F) and up to 80 Brix with full precision due to automatic temperature compensation for accurate reading.

## Perfect maple syrup calibration at a controlled temperature by CDL

#### WATER JACKETED CALIBRATION TANK

### Calibrate and bottle your syrup confidently thanks to our brand new water jacketed calibration tank with a capacity of 130 imperial gallons.

The two 5 000 W (240 V) electric elements heat water in the double wall, gently warming your syrup to the desired temperature. The height of the tank has been designed to fill all types of syrup barrels or totes. The wheeled frame is made of stainless steel. This water jacketed tank kit includes an electric diaphragm pump, a water thermometer, a water and syrup level gauge, and an air agitation system. The Brix reader (optional) will give you greater precision and consistency in the Brix level of your syrup.

### This system, inspired by large operations, is now accessible to everyone!

#### **ADVANTAGES (15" presses)**

- > Tightening with a 12 ton hydraulic cylinder with food grade oil, pneumatic or manually operated (not necessary to have compressed air);
- > Drip tray connected to the pump (Useful for closed loop de-sugaring or for pumping syrup from the tray);
- > Bypass valve installed on the front plate for greater efficiency;
- > Drainage of the inlet and outlet in the drip tray through the front plate;
- > Air drainage (optional);
- > Reverse air flow in the press outlet to extend filtration (optional).

### **STAINLESS STEEL BARRELS**

The CDL barrel is designed according to the recommendations of the Federation of Maple Syrup Producers.

Models may differ from those shown.

### **ADVANTAGES**

- →All lower joints completely welded;
   →Designed for the complete drainage of syrup or washing water;
- →Drip hole on top; No hole on the side;
   →Edges with pronounced curves facilitating the handling of the barrels;
- Same dimensions as conventional galvanized barrels;
- $\rightarrow$ Stackable.

# 5 TIPS FOR PERFECT MAPLE CREAM!

At CDL, we offer a range of four maple cream machines. Here are our top 5 tips for making the perfect maple cream with this essential tool for anyone who processes maple syrup.

- 1. Prepare a cooling bath for the syrup before you start cooking it. Water needs to constantly run in the pan and around your syrup container; a spacer to lift your container and running water are best.
- 2. Make sure your maple syrup is cooked to the correct temperature-don't let it get beyond 22 °F above the boiling temperature of water. In fact, you may want to remove your syrup from the heat at 21.5 °F, since the syrup will continue cooking for a while.
- 3. Let the syrup cool long enough. You want it to stay in the pan for 6 (or even better, 12) hours. After that, it's recommended to let the syrup cool at room temperature for another 4 hours once the container has come out of the cooling pan.
- 4. While the machine is running, use a spatula to constantly scrape the syrup from the sides of the funnel toward the middle of the cone to even out the mixture.
- 5. Once you're done making the cream, keep your machine clean. Follow the cleaning process in the user manual. Store in a dry place.

#### **TESTIMONIAL**

I've been using the CDL 16 L cream machine for several years now. It's easy to use and even easier to clean afterward. It allows me to make a silky maple cream that my customers ask for year after year.»

- Nathalie Lemieux,

ÉRABLIÈRE NATHALIE LEMIEUX - Saint-Pascal-de-Kamouraska

DESIGNED TO MAINTAIN THE SYRUP AT A PROPER TEMPERATURE TO BOTTLE EFFICIENTLY.

1 500 W electric element with thermostat. Can be installed on a 16x16 water jacketed tank (67316M) 664934A

Spacer designed to directly bolt on the propane cooker support.

# LATEST DEVELOPMENTS IN THE **MAPLE NECTAR PROJECT**

At CDL, each of our posts is an opportunity to keep you updated on our innovative projects. It's my personal duty to let you know about the Maple Nectar project—a project I truly believe will benefit the entire maple syrup industry in the near future.

First, here's a little refresher on what Maple Nectar is. It's a new sweetening agent derived from maple sap with a final Brix higher than 60. It isn't altered, denatured, or overheated, which means it keeps the same nutrients as sap straight from the tree. In addition, it's produced with equipment that uses 100% green or carbon-neutral energy.

We've just finished phase 3 of the project, and here are the latest developments:

> The Centre ACER is CDL's scientific partner. They will be validating more research results next season.

- > Since 2021, Maple Nectar has been recognized as an innovative maple product by the Producteurs et productrices acéricoles du Québec (PPAQ) and the Conseil de l'industrie de l'érable (CIE).
- > We gave a talk on the project at this year's International Maple Conference in Lacrosse, Wisconsin, in October. Our colleague Steve O'Farrell was the guest expert for the event.
- Larger-scale production of the Maple Nectar is planned for the 2024 season. CDL's technology centre is planning the final phase of development in the 2023 season.
- > Potential partners in the beverage industry have started to try and use this new sweetening agent as an ingredient. Their goal is to produce beverages that are better for your health

We'll have more details on the project for you at our next Open House. The CDL team is looking forward to it!
