# Signature SPOUTS

## MINIMUM RESTRICTION

The 15° and 45° angles facilitates sap flow and prevents residues or unwanted bacterias from accumulating.

## PERFECT SEAL

Resin conforms to the shape of the tap hole and adheres to the bark.

## SPOUT LENGTH SUITS ALL BARK THICKNESSES

Thin wall maximizes sap flow while minimizing tree damage.

## THE PERFECT CHOICE FOR YOUR SUGARBUSH

**WHITE SPOUTS,  
7% BETTER PERFORMANCE**

ACER

### ACCORDING TO A STUDY FROM THE ACER CENTER

When comparing sap yield, the white Maxflow spout gave a **SAP VOLUME 7% HIGHER** than the black Maxflow spout.

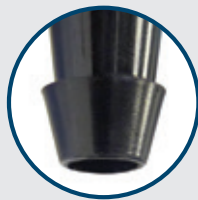

### CONCLUSION OF THE STUDY

In the studied sugarbush, white spouts gave a higher volume of sap compared to the black spouts.

This increase, recorded in the last part of the season, would be related to the color of the spout and its thermal absorption properties.

## BETTER GRIP ON TUBING!

The line of **5/16" Maxflow fittings** was specifically designed and developed for maple producers wanting to operate **over 25 in-hg (high vacuum)**. These fittings enable a perfect seal with a vacuum level beyond 25 in-hg and offers the following advantages:

- > No parting lines on the first barb.
- > Precision moulding.
- > Eliminates micro-leaks caused by molding lines.
- > Better grip on the tubing.

### PRACTICAL TIPS FOR SETTING UP 3/16" GRAVITY TUBING!

- Minimum 3-5% slope
- The steeper the slope, the better the vacuum
- The weight of the water column in the 3/16" line creates the vacuum
- The system must be 100% airtight
- Keep lines as straight as possible
- Approximately 25 taps per 3/16" line
- Material cost is about \$5 per tap
- 3/16" tubing is not compatible with a vacuum pump setup!

## INTELLIGENT VS REMOTE CONTROL

If your model is Intelligent, you will automate and manage 100% remotely all the features of your concentrator according to the defined parameters. If your model is Manual, you can add control modules that allow you to perform certain functions remotely. However, this does not make it intelligent; you will have to perform the actions one after the other through the interface. This will require supervision.

# CDL'S VALUES

Since 1991, CDL has grown guided by values that mirror the maple tree itself:  
**solid, authentic and deeply rooted.**

**Family, fairness, integrity, respect, simplicity, and pride**  
shape who we are and how we work together, day after day.

And if these 35 years have taught us anything,  
it's that maple sugaring is, above all, a story of connection.  
Thank you to all who share and help grow this story with us,  
one spring at a time.
